

1-Hour Technology Workshop

Evaluation Results

Name:

Francis Lester

Would you recommend this 1-Hour workshop to a colleague?

Yes

What grade level do you teach?

7th

Do you feel this tool will engage your students?

Yes

How would you integrate this tool into your instructional activities?

Place students in small groups and have them post their work to their group for peer review and feedback.

Name:

Jose Mason

Would you recommend this 1-Hour workshop to a colleague?

Yes

What grade level do you teach?

6th

Do you feel this tool will engage your students?

Yes

How would you integrate this tool into your instructional activities?

Use Edmodo to communicate with my students when they're out of the classroom, or provide updates to them when they are absent from class.

Name:

Trina Brumfield

Would you recommend this 1-Hour workshop to a colleague?

Yes

What grade level do you teach?

7th

Do you feel this tool will engage your students?

Yes

How would you integrate this tool into your instructional activities?

I would instruct my students to submit their homework and view their grades using this tool. In addition to this, my students can contact me directly to inform me that they won't be able to attend class or to ask a question. Also, my students can participate in online discussions similar to Twitter, which is another Web 2.0 tool that many of them are familiar with.

Name:

Marcus Singletary

Would you recommend this 1-Hour workshop to a colleague?

Yes

What grade level do you teach?

6th

Do you feel this tool will engage your students?

Yes

How would you integrate this tool into your instructional activities?

I would engage my students with content by adding videos aligned to the GPS and have them view them in Edmodo and take a quiz afterwards.

Name:

Janice Thompson

Would you recommend this 1-Hour workshop to a colleague?

Yes

What grade level do you teach?

8th

Do you feel this tool will engage your students?

Yes

How would you integrate this tool into your instructional activities?

I would use the poll feature to periodically check for understanding and receive feedback from my students throughout my lesson; real-time feedback.
